

## The Somerville Next Gen Gateway

The Somerville Next Gen Gateway provides an additional layer of technology over the Somerville Gateway. This technology layer enables organisations to bring remote offices or branch locations on to the network quickly, seamlessly and securely. The Somerville Next Gen Gateway also provides an onramp to other cloud services and simplifies the ongoing management of the extended network.

### Somerville's Aggregated Network

Multiple ISPs are utilised in the Somerville gateway enabling us to provide consistently high speed, high availability connectivity.

- |          |              |
|----------|--------------|
| MegaPort | TGP          |
| BigAir   | NextDC       |
| Vocus    | GlobalSwitch |
| Optus    | Cirrus       |
| Co-Lo AU | AAPT         |
| Telstra  | Equinix      |
