

Unlock your digital transformation with HPE GreenLake

To cope with disruption and uncertainty, your organisation needs to embrace digital transformation today. HPE GreenLake from Somerville offers a new model of IT consumption – all through a cloudlike subscription model.

Why Everything as a Service?

The tech world has moved away from ownership, and is now focused on outcomes. Instead of managing hardware, you can pay for on-premise IT through a metered on-demand consumption model.

60%

of Enterprises will use flexible, lower-cost IT consumption models by 2023¹

87%

of IT decision makers report their organisations have started to implement as a Service solutions²

Lower costs – improved performance

Forrester analysis of the total economic impact of HPE GreenLake reveals organisations can expect:

65%

faster time to value for new services³

30%

CAPEX savings through a pay-per-use model

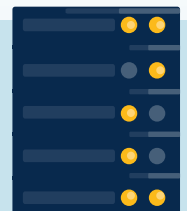

90%

savings on IT professional services

40%

improvements in IT resources productivity

At Somerville, we're to help you move to the next stage of your digital transformation. Whether you're looking for storage, networking or compute resources, we can help you to begin driving the next generation of outcomes by utilising HPE GreenLake.
