

A man and a woman are shown in a server room. The man, wearing a light blue shirt, is pointing at a laptop screen. The woman, wearing a light grey blazer, is looking at the laptop. The background shows rows of server racks with blue doors.

Object Storage: Secure Protection of Your Company Data

Engineered to ensure complete data protection while you retain full control and ownership.

Object Storage Overview

These days, global data is growing at an unparalleled rate. According to IDC, it's expected to reach 175 zettabytes (175 trillion gb) by 2025.

As roughly 80% of that is a collection of unstructured content like PDFs, JPEGs, audio files and videos, things can get messy pretty quick. Plus...it just keeps growing, like the blob that ate your company!

In a perfect world, businesses could use this data to extract deep insights into customer behaviour and market trends, then position themselves for growth and success.

Sound too good to be true?

With Somerville's Object Storage offering, you can store your data on a highly scalable platform that can accommodate hundreds of petabytes, exabytes and beyond. It's enterprise-grade storage, engineered to ensure complete data protection while you retain full control, ownership and access.

As a bonus, our Object Storage is competitively priced with no large up-front costs—you only ever pay for what you use.

Want to turn storage from a burden into a competitive edge? Just ask.

Problems Solved

- Rest assured that your data is safe, secure and backed up
- Risks are mitigated with no manual tape processes and no single point of failure
- Compliant data storage that meets the demands of regulators and auditors and can be quickly and easily accessed
- We remove the difficulties of data management, give you greater visibility and free up internal resources to focus on digital transformation
- Data kept in Australia, with access to local engineers who understand local legislation and data requirements
- Reduce IT costs: enterprise grade infrastructure with no big upfront costs

Use Cases

- Backup and Restore
- Disaster Recovery
- Archive
- Data Lakes and Big Data Analytics
- Hybrid Cloud Storage
- Cloud native applications

Key Benefits

- Peace of mind – Relax knowing your data is safe, secure and backed up.
- Ease of Access – Unified, unlimited, secure access. No VPN or direct connectivity required.
- Visibility – Secure, centralised storage for your most important data.
- Flexibility – Quickly scale your needs up or down based on your organisation's demand.
- No upfront investments – Only ever pay for what you need with our OPEX model.
- Manage complex compliance requirements and meet data sovereignty requirements by storing your data where it needs to stay.
- Locally held data and Australian Support 24x7x365.
- Budget Friendly and competitively priced – More cost-effective than managing in-house and better value than public cloud providers
- Optimise Operations – Increase productivity and innovation by eliminating the burden on technology resources and personnel.
- Get proactive – Predict demand, optimise supply, detect problems and undertake R&D.

Why Somerville?

- Almost 40 years' experience helping Australian customers protect, manage and store their data.
- You'll gain access to our team of highly certified IT experts.
- You can leverage our long-standing relationship with globally recognised technology vendor HPE.
- Our storage platform's underpinned by HP and Scality to provide industry leading data storage infrastructure and services.
- You'll get best-in-class data protection and storage and flexibility to grow with their storage needs.
- You can access and deposit data whenever you need, at no cost.

What's included

- Australian Support 24x7x365
- Industry leading platform: HPE infrastructure, Scality software
- Unified access that enables users and customers to work with the same data
- Easy-to-use management tools
- No ingress or egress charges
- Click of a button scalability
- Be up and running in 24 hours
- OPEX model: budget-friendly regular monthly billing
- 14(9's) of data durability
- 100% availability, zero downtime
- No hidden costs or extra charges

About Somerville

As one of the most experienced end-to-end IT service providers in Australia, Somerville have been delivering almost 40 years of exceptional service and value to our customers across a wide range of industries including; finance, education, legal, insurance, superannuation and automotive. We believe in forging genuine partnerships with our customers, and take the time to understand business needs and internal IT capabilities, to develop innovative solutions to IT challenges that enable change for tomorrow and beyond. Our services include; connectivity, security, cloud, modern workplace, and hardware and software procurement, delivered by our Australian-based team of skilled engineers and all backed by proactive 24x7x365 support, so organisations can rest assured their critical systems are up and running round the clock.
