

Secure Connect GO!

Somerville Modern
Workplace as a Service
(MWaaS)

Work in a Post Pandemic Business Environment

Today's workforce demands flexibility and choice. To remain competitive and retain talent, organisations need to adapt and evolve. To achieve this, they need to foster flexible working environments with seamless connectivity and access to the right business tools and applications.

But with shrinking budgets and growing ICT complexity, managing device fleets is an increasingly challenging task.

Introducing Somerville MWaaS

Somerville MWaaS is an end-to-end solution that delivers a simple to adopt environment designed to minimise headaches, maximise productivity, and drive collaboration while remaining secure, without breaking the bank.

Underpinned by HP technology powered by Intel®, MWaaS gives you end to end design, deployment, and ongoing management of your devices for a small monthly fee per user.

How MWaaS Works

MWaaS offers you a window into the hybrid workplace with a seamless cloud experience. Through the end-to-end design, deployment, and ongoing management of your endpoint devices, enable your team to work from any location - safely, securely, and reliably.

Key Benefits

- Improved business productivity and efficiency
- Fast and easy deployment for a remote workforce
- Reduced device fleet complexity – all managed by Somerville
- More opportunities for business optimisation
- Somerville acts as your own internal support desk
- Move from CapEx to OpEx

Solves Problems

- Somerville support desk can handle your devices remotely, freeing your IT staff to focus time elsewhere
- Support desk management handled on your behalf
- Complete end to end device setup, deployment and ongoing management gives you more time to focus on your business
- MWaaS gives your team the freedom and flexibility to work from wherever they choose

Why Somerville

- Almost 40 years' industry experience
- Currently run device fleets for some of Australia's leading organisations across mining, automotive, finance, education, and utilities industries
- Strong partnerships with leading technology vendors such as HP, Intel® and Microsoft
- Customer first approach
- Well established local service desk

MWaaS Includes:

- Pre-imaging of devices
- Setup, configuration, and deployment of devices
- Troubleshooting for any device issues
- Remote Application deployment
- Ongoing support from Somerville Specialists
- Administration related to endpoint deployment
- Ongoing management of Support Desk
- 24x7x365 access to Somerville Support Technicians

Get started with a small monthly fee

Comprehensive endpoint management of this scale typically requires 4-5 dedicated staff but with Somerville it is all taken care of.

Talk to our team of specialists today to ensure your team gets the most out of their tools regardless of where they are located.
