

Infrastructure- as-a-Service

The affordable, flexible way to get the
on-demand functionality your organisation needs

Infrastructure-as-a-Service Overview

With Somerville's Infrastructure-as-a-Service (IaaS), you can quite literally have it your way.

Whether you need to increase your storage capacity; outsource your firewall management; or simply want to make use of our pedigree in networking and infrastructure management. No problem - we can help with our highly scalable, adjustable and on-demand service. All maintained by the expertise of our - Australian-based - certified system engineers.

Best of all, you have the full control and visibility of everything. Complete oversight, while removing those large up-front costs which have been diminishing your budget for years. It is the best-of-both-worlds.

Whatever the requirement, Somerville has you covered - because Somerville is big enough to deliver, but small enough to care.

Problems Solved

- Daily maintenance – removing the burden of these tasks and ensuring everything is up to date
- Remove large upfront investment spending
- Rapid flex capability – as you need
- Freeing up time and facilities – no need for a data centre on premise
- Provision of a highly secure, fire, flood and dust proof environment for your infrastructure
- Compliance with data regulations/requirements

Key Benefits

- Gain valuable IT service cycles hours back to your IT services team (equivalent to 2 people focused on business productivity)
- Service supported by subject matter experts who monitor and manage your virtualised infrastructure 24 x 7 x 365
- Administrative access is provided for complete control and visibility
- Reduce total IT operating costs by eliminating the need to build, maintain and support an in-house data centre
- Get access to enterprise grade hardware from tier-1 vendors with no initial outlay or refresh cycle
- Dedicated hardware provisioning so there is no sharing of infrastructure across different organisations
- No need to upskill your team in 'lights-on' technology – have more time to focus on your core business
- An optional direct link to data centre for added security and compliance

Why Somerville?

- With almost 40 years' experience, we're focused on helping you simplify IT operations to improve productivity, maximise performance and manage costs
- Service is hosted and managed by Somerville. No white-labeling of services
- Australian-based local support team who you have direct access to when needed
- Cloud infrastructure is architecturally engineered for high reliability
- Enjoy seamless scalability to additional cloud services
- Service underpinned by tier 1 vendor hardware and support
- Our people are some of the highest certified technical experts in the industry

What's Included

- 24/7 management and monitoring
- Product lifecycle management in support of green manufacturing
- High performance networking, storage and compute
- Highly redundant infrastructure including multiple layers of data protection and resiliency
- All operating responsibilities and risk management
- Complete local expert technical support
- Vendor relationship management
- Data hosted in ISO27001 certified data centre
- Data centre compliance with regulatory frameworks
