Platform- as-a-Service

Improve operational efficiency,
agility and speed to market

Platform-as-a-Service Overview

Remember data centers? When you needed a new server you would need to find some rack space, order the hardware, wait for it to arrive, build it and then attempt to activate that operating system license.

It feels like we had more time back then.

With today's IT demands, these sorts of delays are just not palatable and have significant impacts on operations.

With Somerville's Platform-as-a-Service (PaaS) you can deploy additional compute power in minutes. All powered by tier one vendor solutions and supported by an Australian-based engineering team who are armed to the teeth with training and certifications.

No hardware to manage, no delays and backed-up by a team of experts available to you 24/7. How much more compelling can we make it?

Problems Solved

- Daily maintenance and management – removing the burden of these tasks and ensuring everything is up to date
- Remove large upfront investment on hardware
- Free up time and facilities – no need for data centre on-premise resulting in cost savings: room space, lighting, air con, fire safety measures, insulation and electricity
- No need to worry about compliance with regulatory frameworks
- Old hardware is taken care of and recycled
- PaaS is underpinned by strong LAN and WAN links which would be much more costly for a business to replicate in a data center
- Redundancy built into PaaS which would be an additional cost if deployed in-house

Key Benefits

- Gain valuable IT service cycles hours back to your IT team (equivalent to 2 people)
- 24/7 management and monitoring
- Speed to market as service is turned on within minutes. Avoid procurement wait times
- Rapidly add capacity in peak times and scale down as needed
- Highly secure, fire, flood and dust proof environment for your infrastructure
- Our knowledge is your advantage: Gain expertise from our skilled engineers and architects
- Gain administrative access for complete control and visibility
- Access to enterprise grade hardware from tier-1 vendors with no initial outlay or refresh cycle
- Reduce the licensing burden and receive just one centralised bill
- Your choice of virtualisation technology, best-fit for your needs and deployment
- No need to upskill your team in 'lights-on' technology – have more time to focus on your core business

Why Somerville?

- Almost 40 years' of IT experience with over 50,000 users on our network every day
- Services are hosted and managed by Somerville. We don't white label services
- Australian-based local support team who are here to assist you 24x7x365
- Solutions are unique to your custom requirements, needs and specifications
- Service is underpinned by tier 1 vendor hardware and support
- Our people are some of the highest certified technical experts in the industry
- Hardware hosted in Australia meaning data contained is subject to local legislative controls and protection
- Proactive and responsive support resulting in limited delays in ticket handling
- We provide an optional direct link to the data centre

What's Included

- 24/7 management and monitoring
- Hypervisor management
- Hypervisor & OS licensing
- Product lifecycle management in support of green manufacturing
- High performance networking
- Scalable high performance storage options
- High performance compute
- Vendor relationship management
- Data hosted in ISO27001 certified data centre
- Data centre ensures adherence to various compliance regulations
- Quick provisioning of service
- 14-day incremental backup
- Optional firewall service

About Somerville

As one of the most experienced end-to-end IT service providers in Australia, Somerville have been delivering almost 40 years of exceptional service and value to our customers across a wide range of industries including; finance, education, legal, insurance, superannuation and automotive. We believe in forging genuine partnerships with our customers, and take the time to understand business needs and internal IT capabilities, to develop innovative solutions to IT challenges that enable change for tomorrow and beyond. Our services include; connectivity, security, cloud, modern workplace, and hardware and software procurement, delivered by our Australian-based team of skilled engineers and all backed by proactive 24x7x365 support, so organisations can rest assured their critical systems are up and running round the clock.
