

Secure Connect GO!

Modern Workplace as a Service (MWaaS)

A Next-Generation Workplace Ready for Tomorrow, Today.

Today's workforce needs the choice to be able to work from wherever they choose. Whether it's at their child's swimming lesson, onsite with a customer or from home.

To maintain that competitive edge and retain staff, it's more important than ever to offer this type of flexible working environment, with seamless connectivity and access to business tools and applications from anywhere.

Somerville's Modern Workplace as a Service provides set up, deployment and ongoing management of your team's devices. It empowers your team to work from wherever they want or need to, safely, securely and reliably—all for a small per-user monthly fee.

Includes

- Pre-imaging of devices
- Setup, configuration, and deployment of devices
- Troubleshooting for any device issues
- Remote Application deployment
- Ongoing support from Somerville Specialists
- Administration related to endpoint deployment
- Ongoing management of Support Desk
- 24/7 access to Somerville Support Technicians all year round

Challenges

Maintaining a Competitive Edge

As we've seen over the past year, businesses need to be able to adapt quickly and remain productive when staff aren't working from the office. MWaaS allows your business to do this with a secure, reliable and fully managed virtual workplace.

Retaining Staff

Organisations need to foster flexible working environments to give staff freedom to work efficiently and securely from anywhere. MWaaS can help improve staff morale, wellbeing and productivity.

Security Issues Associated with Working Remotely

Somerville's MWaaS allows your IT department to retain critical control over access and security, ensuring corporate applications and data are used appropriately.

Troubleshooting

Somerville's support desk is there for your business 24/7. Providing local, personalised support when you need it.

Setup, Deployment and Management Costs

Average mid-size organisations need 4-5 staff to manage remote and hybrid work environments. Somerville's "Secure Connect Go!" complete end-to-end device setup, deployment and ongoing management frees up your IT staff to focus their time on more strategic IT priorities.

Key Benefits

- Improved business productivity and efficiency
- Enables staff to work from anywhere with seamless connectivity
- Keeps apps and data secure
- Somerville support your organisation 24/7/365 as if it were your own support desk
- Fast and easy deployment
- Reduced device fleet complexity—all managed by Somerville
- Business optimisation—Somerville manage your endpoint while you get on with running your business
- Move from CapEx to OpEx
- Low monthly fee, per user
