Multi-Cloud Connectivity

High-speed, high performance connectivity
for accessing critical workloads in private,
hybrid and multi-cloud environments

Multi-Cloud Connectivity

Today's complex challenges often require complex multi-faceted solutions.

Our experience has taught us that cloud adoption tends to be more complicated than simply using one public service for all requirements.

And while one door closes, another door opens and with this comes potential connectivity issues.

Enter Somerville stage left.

Somerville's high-speed, high performance connectivity for accessing critical workloads in private, hybrid and multi-cloud environments, is highly configurable and customised to your needs. This ensures that you can quickly and securely access your most important cloud resources from one interconnection point exactly how you like.

With nearly 40 years of experience – you bring the challenges, we will bring the solutions.

Problems Solved

- We remove headaches associated with managing multiple vendors – we're the single point of contact
- For organisations unsure about what connectivity direction to take, we can help you navigate your journey and provide the right advice and stack of solutions based on your organisational needs.
- Have the confidence knowing that you have the right connectivity solution built for tomorrow and beyond
- Peace of mind knowing your connectivity solution is reliable, resilient and maximises uptime

Key Benefits

- Easy transition to Somerville's Private Cloud/Data Centre services
- Cost-effective method of managing cloud strategies
- On-demand scalable bandwidth capabilities to enable the ability to flex capacity according to usage
- Deal with ONE single provider across multiple vendors so you're not restricted to one vendor at one site – Somerville can look at best options for you based on your needs and goals
- A single point of contact and support ensures rapid, responsive service
- Enjoy convenience as we allow you to move data between different public cloud vendors easily
- Fully-managed service offering that frees up internal time and resources so you can focus on your core business
- Virtual private network access across Hybrid and Multi-cloud deployments
- Optimised to support public and private cloud workloads

Why Somerville?

- Somerville only work with best of breed technology partners and service providers
- Purpose-built network to work hand-in-hand with multi-cloud / private / hybrid cloud solutions to support critical workloads
- Tailor-made solutions based on your organisation's unique needs and business goals
- We have deep technical expertise and the ability to direct customers down the right path
- Flexible contract terms based on your preference – i.e. month to month billing
- Experience – almost 40 years experience – we know how to overcome the most common and complex connectivity issues

What's Included

- Higher availability via advanced multi-link Border Gateway Protocol (BGP)
- Highly customisable MPLS solution
- Virtual private network access across Hybrid and multi-cloud deployments
- Optimised and support public and private cloud workloads
- Access to data centre connectivity services
- Support for hybrid SD WAN deployments
- Fully Managed end to end connectivity solution
- Flexible 24x7x365 local support and SLA options

About Somerville

As one of the most experienced end-to-end IT service providers in Australia, Somerville have been delivering almost 40 years of exceptional service and value to our customers across a wide range of industries including; finance, education, legal, insurance, superannuation and automotive. We believe in forging genuine partnerships with our customers, and take the time to understand business needs and internal IT capabilities, to develop innovative solutions to IT challenges that enable change for tomorrow and beyond. Our services include; connectivity, security, cloud, modern workplace, and hardware and software procurement, delivered by our Australian-based team of skilled engineers and all backed by proactive 24x7x365 support, so organisations can rest assured their critical systems are up and running round the clock.
