

SD WAN as-a-Service

An enhanced connectivity experience offering
central manageability and reduced costs

SD WAN-as-a-Service

Great...so you have got yourself a really fast internet connection, but what happens when the entire department fires up Netflix at lunch time?

Don't get us wrong, we like to binge-watch as much as the next person, but access to your core systems and applications are more important.

With Somerville's SD WAN-as-a-Service, you can prioritise traffic and dedicate routes, leveraging a combination of transport services – such as MPLS, LTE and broadband – to ensure that the things that matter, get the bandwidth they need.

With our decades of experience working with market-leading network vendors, you benefit from an enhanced connectivity experience while paying a simple all-in-one monthly fee - avoiding the significant capital investment that would be required to achieve the same thing in-house.

There's no need for compromise, Jerry can continue with "The Tiger King" and you can keep your IT service running at peak performance.

Problems Solved

- Remote working and collaboration places huge demands on network performance such as high latency, packet loss, bandwidth limitations and congestion
- Poor end user quality of experience and impaired application performance
- Increased risk from managing and optimising the use of multiple cloud providers
- Technology demands are continually growing and needed for today's changing environment
- Slow cloud-based applications
- Cybersecurity concerns as SD WAN ensures consistent security at all edges
- Networking is not something you can just refresh or add a few features to. It's complex and requires the right expertise and knowledge

Key Benefits

- WAN optimisation: Prioritised traffic/dedicated routing for better speeds and performance across multiple locations for remote working
- Deal with just one single provider that are across multiple-vendors, so you are not restricted to one vendor at one site – we look at the best options for your specific needs
- Deployment and ongoing support are managed by our Somerville HPE/Aruba certified and experienced specialists
- OPEX model ensures reduced costs: No initial capital outlay and pay as you go
- Connect to cloud with greater speed and reliability, and optimise cloud app performance
- Improved edge-to-edge security
- Improved visibility into activity

Why Somerville?

- Somerville help you navigate the SD WAN product market and find the right solution for the right price point
- Partnerships with best of breed technology vendors – Gartner leaders
- Certification and expertise – Our team is made up of skilled solution architects to design and deploy high performance connectivity specifically tailored to your organisation's needs and goals
- Experience – With almost 40 years in business – we have seen all the common connectivity issues and know how to effectively overcome them
- We ensure the deployment is done right the first time

What's Included

- Fully Managed Service: Patch, policy, security management, scheduled maintenance, and change management and recommendations
- Reporting: Comprehensive real-time monthly reporting
- Visibility into real-time network statistics and incidents via dashboards and alerting options
- Integration with centralised security: Fully supports Checkpoint, Zscaler and Palo Alto integration
- SD-Branch: Visibility to APs, Switches, Gateways, *RAP at Micro Branch or at home employees, office connects with SD WAN
- Easy Deployment: Zero Touch Provisioning of Gateways (Plug n Play) and limits provisioning errors
- Encryption: Pipe is completely encrypted (tunneling)
- High Secured ZTP: Connected through Trusted Platform Module (TPM)
- Additional security for branch sites: Micro segmentation and a decreased load on the data centre by providing local branch internet breakout (SIP traffic)
- 24x7x365 local and proactive support

About Somerville

As one of the most experienced end-to-end IT service providers in Australia, Somerville have been delivering almost 40 years of exceptional service and value to our customers across a wide range of industries including; finance, education, legal, insurance, superannuation and automotive. We believe in forging genuine partnerships with our customers, and take the time to understand business needs and internal IT capabilities, to develop innovative solutions to IT challenges that enable change for tomorrow and beyond. Our services include; connectivity, security, cloud, modern workplace, and hardware and software procurement, delivered by our Australian-based team of skilled engineers and all backed by proactive 24x7x365 support, so organisations can rest assured their critical systems are up and running round the clock.
