National Network V5

(Powered by Cisco)

The quality of the digital infrastructure you rely on
is the foundation to any successful organisation.

National Network V5

The quality of the digital infrastructure you rely on is the foundation to any successful organisation.

We understand that selecting the right IT services partner is never easy when you have ever changing and complex needs. However, one thing remains constant; the investment the partner has made in its own network that supports your connectivity requirements.

Somerville's National Network V5, powered by Cisco carrier network technologies, introduces new architecture and deployment capabilities, increased capacity and stronger performance, security and visibility.

The million dollar (1.2M) investment in Somerville's network is built on Cisco's Network Convergence System (NCS) platform that offers industry-leading 100 GbE and 400 GbE capacities to cater to today's high capacity traffic volumes and customer requirements.

Equipped with robust security, telemetry, advanced management and resilient capabilities, Somerville's National Network V5 is designed for operational simplicity and also features MPLS segment routing and long-term scalability and automation in mind.

Problems Solved

- Total cost of ownership for customers is lower so you can enjoy more competitively priced connectivity solutions.

- Get the most responsive and proactive service and support – don't wait around for a call back.

- Adapt quickly with faster transitioning capabilities and service modifications, reducing complexity and risk.

- We provide the solution your organisation actually needs. Not the other way around.

- We don't believe in lock-in contract terms so you can enjoy flexibility in service modifications as your business grows and adapts.

Why Somerville?

- We're an IT services partner that genuinely understands your challenges and can help you address them with network infrastructure that's scalable for your needs today, and tomorrow.

- Somerville are not your average Internet Service Provider. We're better positioned to develop fit-for-purpose, tailor-made technology solutions to organisations Australia-wide.

- Our core network upgrade supports security and compliance requirements for added peace of mind.

- We have a strong partnership with Cisco – the largest and most reputable networking technology company in the world.

- We're dedicated to building the most resilient network infrastructure to support our customer connectivity requirements and guarantee network uptime.

- We offer more competitively priced connectivity solutions.
